  Dry Weather Monitoring

Inefficient Manual Process

Manual inspection is inefficient, long drawn, expensive and never sure if all regulatory compliances are meet

Efficient Digitized Process

Using the SWPPP Platform is efficient, effective and you have peace of mind that things have been done the right way

You   Decide

Inefficient Manual Process:

1. Inspect site and take notes and photos
2. Digitize handwritten notes
3. Sort issues into categories
4. Copy findings for foreman
5. Work to correct issues
6. Inspect corrected issues
7. Compile photos & notes for report
8. Generate reports

More Time & Money spent

Efficient Digitized Process:

1. **Inspect, create action items** with photos (1 step with iPad)
2. Collaborate, track and work to **correct issues**
3. Automatically generate **reports**

Save Time & Money

For everyone

SWPPP platform is designed keeping in mind the needs of all end users.

LRPs/Owners

SWPPP platforms can assist all sectors of LRPs to achieve compliance.

- Construction
- Industrial
- Cities & Counties
- Municipalities
- Commercial & Manufacturing
- Mining

SWPPP Platform can be easily configured to all segments of the industry vertical who have to comply with specific regulatory needs. LRPs can significantly increase efficiency by standardizing processes and information access across projects /organization by bringing all stake holders on the **"same platform"**.

Consultants/Contractors

SWPPP platform can empower consultants/contractors of all sizes – from corporates to small enterprises

- Improve the quality of data captured and bring efficiency in the process
- Inspectors can now do what they are supposed to do- oversight and inspections in the field, and not sit in front of computer compiling reports. Which is now done automatically by using our solution
- Step into the 21st century and provide the experience and service your clients look for

Solution Highlights

SWPPP platform makes compliance easy and yields business benefits through sustainable business process improvements.

- Comprehensive coverage across all aspects of compliance requirements, which go beyond just inspections management
- Mobile first solution with online and offline capabilities for improved efficiency and superior user experience
- Ready for business with risk level, permit and site specific forms, dashboards, reports and processes
- SaaS solution to help you respond to demand fluctuations at the click of a button, so that you pay for what you use
- Open platform that is easy to integrate with in-house data management, security and reporting systems

Inspections

- Digitized data entry & annotated pictures on the field
- Geo tag & auto date stamp pictures
- Collaborative action item workflows & alerts

Weather Tracking

- Storm alert based on NOAA forecast
- Auto archival of NOAA daily forecast
- Location based weather alert

Training

- Training scheduling
- Centralized logs for reporting

Non-compliance

- Logging and tracking Escalations
- Status monitoring

Schedule of Value

- Budget management
- Real-time material monitoring & costing
- Optimize inventory

Asset Management

- Maximize lifespan and performance of assets while minimizing lifecycle operating costs
- Automated alerts for periodic maintenance

REPORTING & ANALYTICS

- Centralized data & logs for audits
- Automated regulatory reporting
- Root cause analysis

Benefits

SWPPP platform empowers organizations to meet all storm water compliances requirements. It -

Alleviates risk of fines

• Do not miss any critical action through automated alerts – e.g. pre-storm inspection alert, action overdue alert etc.

• Do not miss any reports deadline or file incorrect/incomplete report due to scattered offline data

• Do not worry about evolving and new regulatory requirements as the platform will keep pace with the changes

Reduces cost of compliance

• Lower time and effort spent on conducting an inspection and creating reports

• Eliminate non-value added activities like data collation, photo upload & annotation, review and consolidation

• Eliminate manual follow-ups and improve user experience through custom workflows
